

How do I view all forum posts that a student has made?

It is possible to view all of a student's postings and responses for the discussion forums within a course. However, you cannot select individual forums.

Click on any forum in course.

Click on the student's name in the **Started by** column.

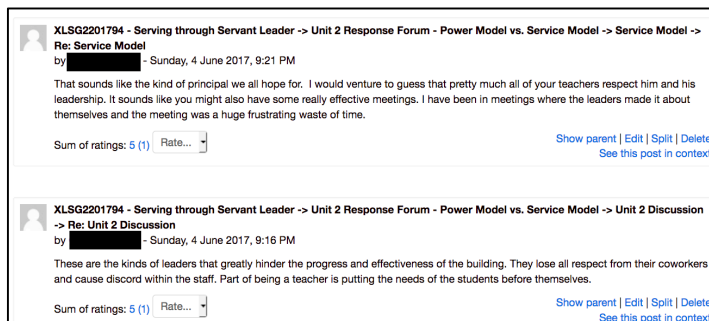

Student names blocked out for privacy reasons.

On the student's profile page, look for the **Miscellaneous** block. Click on **Forum posts** to view all initial postings and responses.

Miscellaneous

- [Full profile](#)
- [View all blog entries](#)
- [Notes](#)
- [Forum posts](#)
- [Forum discussions](#)

Pages will display all the activities for that student. Each posting and response the student has made for a forum will show.

Note: The report begins with the latest posting by calendar date and descends to the earliest date.
